25X1

1. Work on the expansion of the airfield has now been completed. The length of the northwest/southeast runway has been increased to 3,200 meters and its thickness to 45 centimeters. Seventy-five revetments have been built northeast of the runways and between them. Each of these shelters, it is believed, could comfortably hold an aircraft with a wingspan of 25 meters.
2. Except for an unspecified number of MIG-15's which landed on the airfield in the morning of 5 or 6 October, no other aircraft had been observed there prior to 11 October. About 250 ground personnel are stationed at the airfield.
